Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought
- [DTF Drought Update 08/17/15 is attached](#)

Weather of Concern

- Gradually weakening high pressure will keep excessive heat in the forecast through Wednesday evening for the southeastern desert areas of California, followed by a gradual downward trend to near or slightly above normal temperatures through the end of the week and into the weekend.

Active Weather Warnings, Watches and Advisories by County:

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

High pressure will ease a bit over the next couple days, allowing for a modest cooling, but temps are expected to remain above normal across the interior and seasonable at the coast. Light offshore flow tonight will likely bring another smoky and hazy day to all of northwest California. No rain is forecast in the short term. Latter portion of the week a short-wave trough will roll over the top of the ridge and into the Pacific Northwest. This trough looks quite dry with no chance for any significant precipitation. This pattern does suggest better chances for cooling so trended temperatures downward. Ridge aloft should spring back up over the weekend before another trough starts to move toward the west coast late in the weekend into early next week.

Medford Weather:

The thermal trough will shift inland today, bringing the hottest day of the week to the bulk of the forecast area. Triple digit highs will not be uncommon for the valleys of the west side, with at least 90s over all but the highest elevations. Offshore flow will weaken today, and allow a slight southerly push to keep temperatures down. Tonight, expect another round of higher than normal lows, as offshore flow becomes weaker, but still in place. The thermal trough will shift farther east Wednesday, with the highest temperatures of the week occurring along and east of a line from Alturas through Lakeview. The rest of the area will see temperatures lower slightly. Further cooling for the entire area will occur later in the week as a weak trough digs south along the coast of the Pacific Northwest and a possible dry cold front pushes in Thursday and Friday. Along the coast Thursday morning, a period of onshore flow could bring some patchy fog and light drizzle, but there is very little chance for measurable precipitation. The coolest day of the week will be Friday, with highs across most of the area dropping below 90. A brief period of ridging and the return of the thermal trough are expected over the weekend.

Reno Weather:

Dry weather will continue this week as high pressure remains in control. While a few locations in the Sierra and western Nevada may set new record highs Tuesday and Wednesday, nighttime lows will be cool and seasonable. Expect typical afternoon zephyr breezes and mostly clear conditions. Areas of smoke are expected near and east of active fires in Mono and Churchill counties.

San Francisco Weather:

A cooling trend will continue through late week as onshore flow increases and the marine influence becomes more predominant. Coastal clouds and patchy fog will also become more widespread through midweek, spreading inland during the overnight and early morning hours. Aside from the potential for patchy coastal drizzle the next few mornings, dry weather conditions will persist through the forecast period.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Hot weather continues across most of the interior of northern California today as strong ridging extending from the Gulf of Alaska to the desert southwest remains overhead. The exception will be the Delta and southern Sacramento Valley where the return of the Delta Breeze will bring cooler temperatures today. Gradually milder temperature readings are expected by the end of the week.

Hanford Weather:

Dry weather can be expected over the central California interior for the next several days. Temperatures will be well above normal through the middle of the week as a strong ridge of high pressure builds over the state.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A cooling trend and an increase in night through morning low clouds and fog is expected through mid-week, as upper-level high pressure over the southwest weakens and onshore flow increases. Temperatures will return to near or slightly above normal by the weekend as high pressure aloft re-develops.

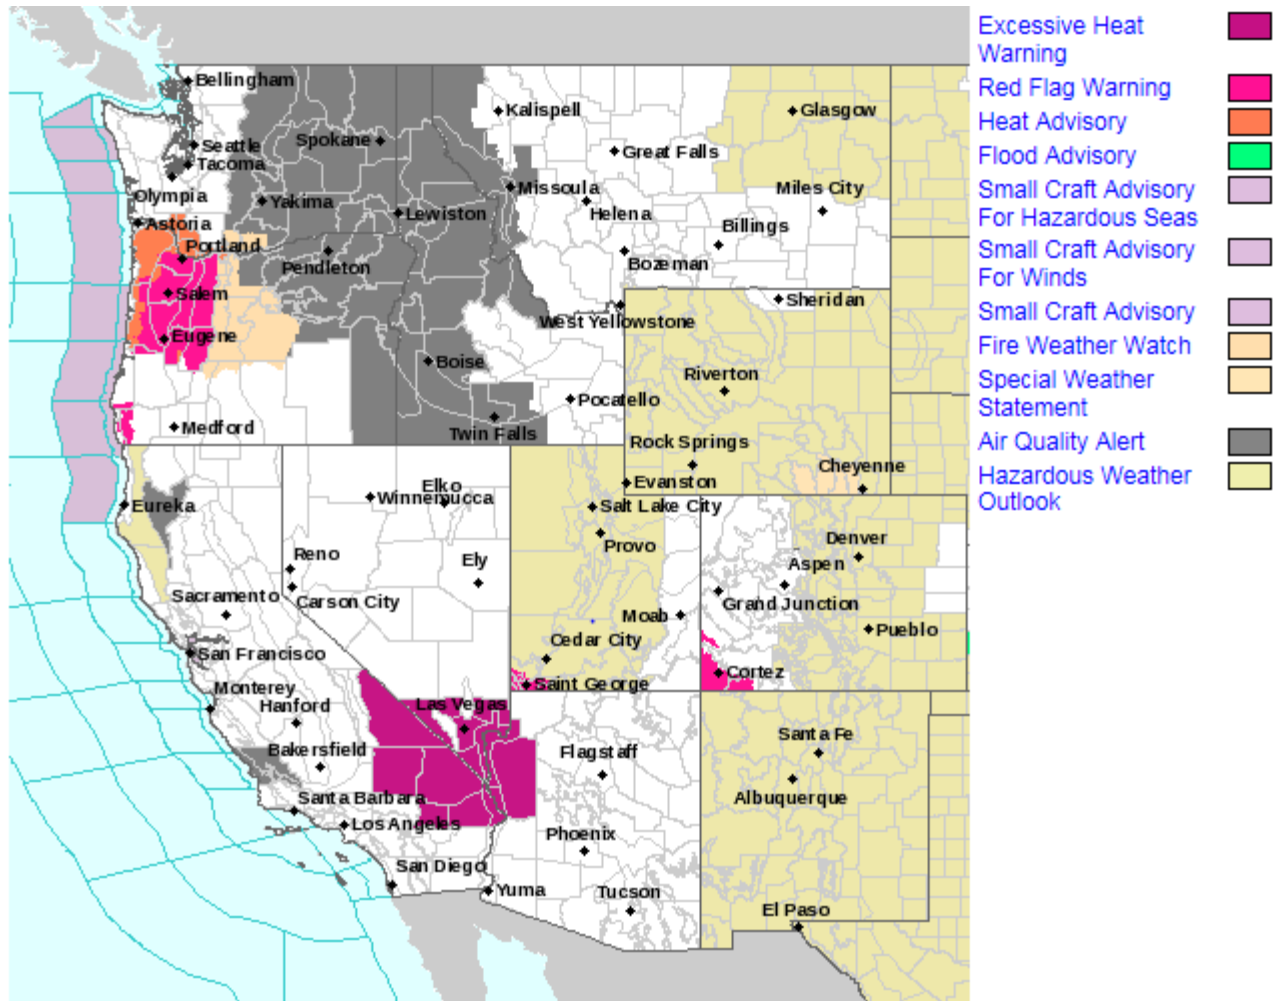

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

High pressure aloft will weaken and move south of southern California as a trough of low pressure moves inland through the Pacific Northwest. This will bring increasing onshore flow with a cooling trend through Friday, locally gusty west winds in the mountains and deserts, and deepening of the marine layer with areas of night and morning coastal low clouds and fog spreading into the far inland valleys later in the week. For Saturday through early next week, high pressure aloft will shift northward into southern California bringing a warming trend and shallower marine layer with a brief influx of monsoonal moisture possible early next week.

Southeast California Weather:

Very hot conditions will continue through Wednesday before cooling back to near normal by the weekend. Dry and occasionally breezy conditions are expected across the region through the weekend.

SITUATION SUMMARY

FIRES, SOUTHERN OPERATIONS AREA

Lincoln Fire, Vegetation Fire, Los Angeles County

Location: Whittier Narrows, Montebello, Los Angeles County

Jurisdiction: LRA

Start Time: 8/16/15 at 1700 hours

Per Cal OES Duty Officers as of 08/17/15 at 0930 hours:

- 370 acres, 80% contained as of approximately 1600 hours on 08/17/15, per LA County Fire PIO.
- There are no threats to structures or infrastructure
- There is no forward progress - the flanks are being worked to attain full containment
- There are no road closures
- Major Concerns: There are production oil pipelines in the area of the fire.
- State Fire Marshall (SFM) reports that the single pipeline under their jurisdiction is the Crimson Pipeline, and they are in contact with the Crimson Operations Manager at this time. SFM also reports that the fire is moving away from the pipelines to the northeast.
- Per SFM, Crimson stated that they do not have any tanks in the area. They receive crude oil from a production lease and ship it through a 6-8-inch gathering line (CSFM Line ID 0827). This line appears to be southeast of the fire but Crimson is sending a representative to the Lincoln Fire to inform the FD on scene.
- Additional production oil lines are in the area and the Department of Oil and Gas (DOG) reports that the main production oil field and production pipelines are owned by Freeport McMoran Oil and Gas, who they will be in contact with on Monday 08/17/15.
- Per the LA County OEM duty officer: Southern California Edison (SCE) reported that 66kV and 16kV lines have been damaged.
 - The California Utilities Emergency Association (CUEA) is in contact with SCE who reports that they are doing a work around to the damaged 66kV power line and there is no impact to the Grid.
- The fire caused SCE and privately owned oil drilling company downed power lines. About 60-160 residents are still experiencing power outages. SCE reported crews are in the area working on repairing the downed power lines and restoring power to the impacted residents.
- There are no requests for assistance or unmet needs at this time.

SITUATION SUMMARY

FIRES, SOUTHERN OPERATIONS AREA

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every Monday at 1100 hours.

FEATURED TRAINING at Cal OES Mather HQ

Advanced Disaster Recovery Strategies for Local Communities - September 3, 2015

The goals of the course are to prepare participants to:

- Engage the target audience with the disaster recovery process
- Discuss federal, state, and local regulations, guidelines and tools pertaining to disaster recovery
- Review contemporary research and literature concerning disaster recovery at the local level
- Examine a wide range of hazards and their impacts on recovery

Climate Adaptation Strategies for Emergency Services - September 4, 2015

The purpose of this eight hour training course is to prepare the community and the emergency services sector for the climate adaptations and systems vulnerabilities that might occur from hazard impacts. The course is developed to enhance awareness to future climate hazards and impacts that the emergency services sector may face. Although this course will be developed and delivered with a national scope, it will emphasize the importance of the local emergency services sector.
